Dan,

Thank you for the update. Will Feezor be here also? If not then I need a point of contact with Auxier.

Greetings Dan,

The only field work that will be accomplished before January 6th, 2014 would be the establishment of the air monitoring system. Auxier will be flying in on the 19th (Thursday), but they will not conduct any work other than collecting supplies at local vendors until Friday 12/20. While we envision this will only take 1 day to establish, they may have to work into this weekend to complete it.

Thank you,
Dan Feezor

Paul, Dan, Victoria, can you provide the information Katy Miley requests below? She's coordinating our OSC oversight of the Phase 1b/2 fieldwork.

Thanks,
Daniel R. Gravatt, PG

Dan, Jeff,
Please see Kevin's note below...can we find out the contractors full planned schedule until 12-25 so that we can decide how to manage Kevin's deployment?

Subject: Westlake Update version 2

Just received a call from Paul Eastvold with Feezor, he stated that the air monitors will not be delivered until either Thursday or Friday at the latest.

The contractor will mobilize on Thursday.

My question is this, do I demob and return on Thursday? Or stay here since I would be driving back on Wednesday to turn around and drive back here on Thursday. I have other work I can do from here that I brought with me, just requesting some guidance.

Thank you
